Letter of Recommendation

To Whom It May Concern:

Menahi Shayan is one of the most outstanding students I've encountered throughout my career as the Head of the Computer Science and Engineering department. Right from his first semester, Shayan has always managed to stand out from the rest. With an exceptionally diverse skillset, professional craftsmanship, a relentless strive for perfection, Shayan has been one of the biggest assets to our department these last four years. Shayan's contributions can be characterized by impeccable quality, exceptional professionalism, and a degree of meticulousness that can only come from dedication, diligence and profound passion for the work that he does.

Shayan has headed the Core Team for multiple intra-college and inter-college festsand also served as the student in-charge of the Cultural Committee in the year 2019. But his leadership portfolio extends even beyond extra-curricular committees. He also served as the President of The Intellects Forum, the department's very own technical forum, in the same year. The sheer number of events, teams and committees across various disciplines that he has been able to lead in parallel while excelling at each one of them is an astonishing feat and a clear measure of how far out of the competition he stands. Shayan also manages to excel academically. His early specialization in all of the industry-relevant tools, frameworks and technologies has consecutively put him at the top of his class, and being of the selfless helpful nature that he is, he has taken it upon himself to imbibe his knowledge and skills to the other students through the numerous technical workshops and seminars that he has hosted over the years. He has worked on multiple projects across both software and hardware-oriented domains, most notably, the "Automated Oven" which was awarded the Best Project Award in multiple national level project exhibitions assessed against hundreds of projects from across the country. He has also co-authored a technical paper in the field of IoT presented at IIT Kharagpur's IEEE conference of 2021.

Shayan's long list of achievements is diverse and amusing, just as the qualities they describe. It is clear that he will be an exceptional asset to any institution or workforce he shall be a part of, and it is with the utmost confidence and wholeheartedness that I recommend Menahi Shayan for the program at your University.

Head of Dept. of Computer Science & Engg
A M C Engineering College,
